

Blockstack & P2P Exchange

Zagreb, 2017

Building a decentralized internet

About Me

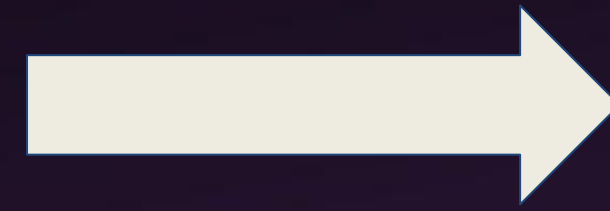

MARIN-BASIC d.o.o.

- Entrepreneur, Developer, Investor
- Adult, Medical, Blockchain Industry

Web: marin-basic.com
Github: MarinX
Twitter: marin02basic

I got 99 problems, but server ain't one

- Mass Data Breaches
- Insecure Connections
- Platform Lock-in

- Own Your Data
- Own Your Apps
- Own Your Identity

...but decentralized apps are hard to build

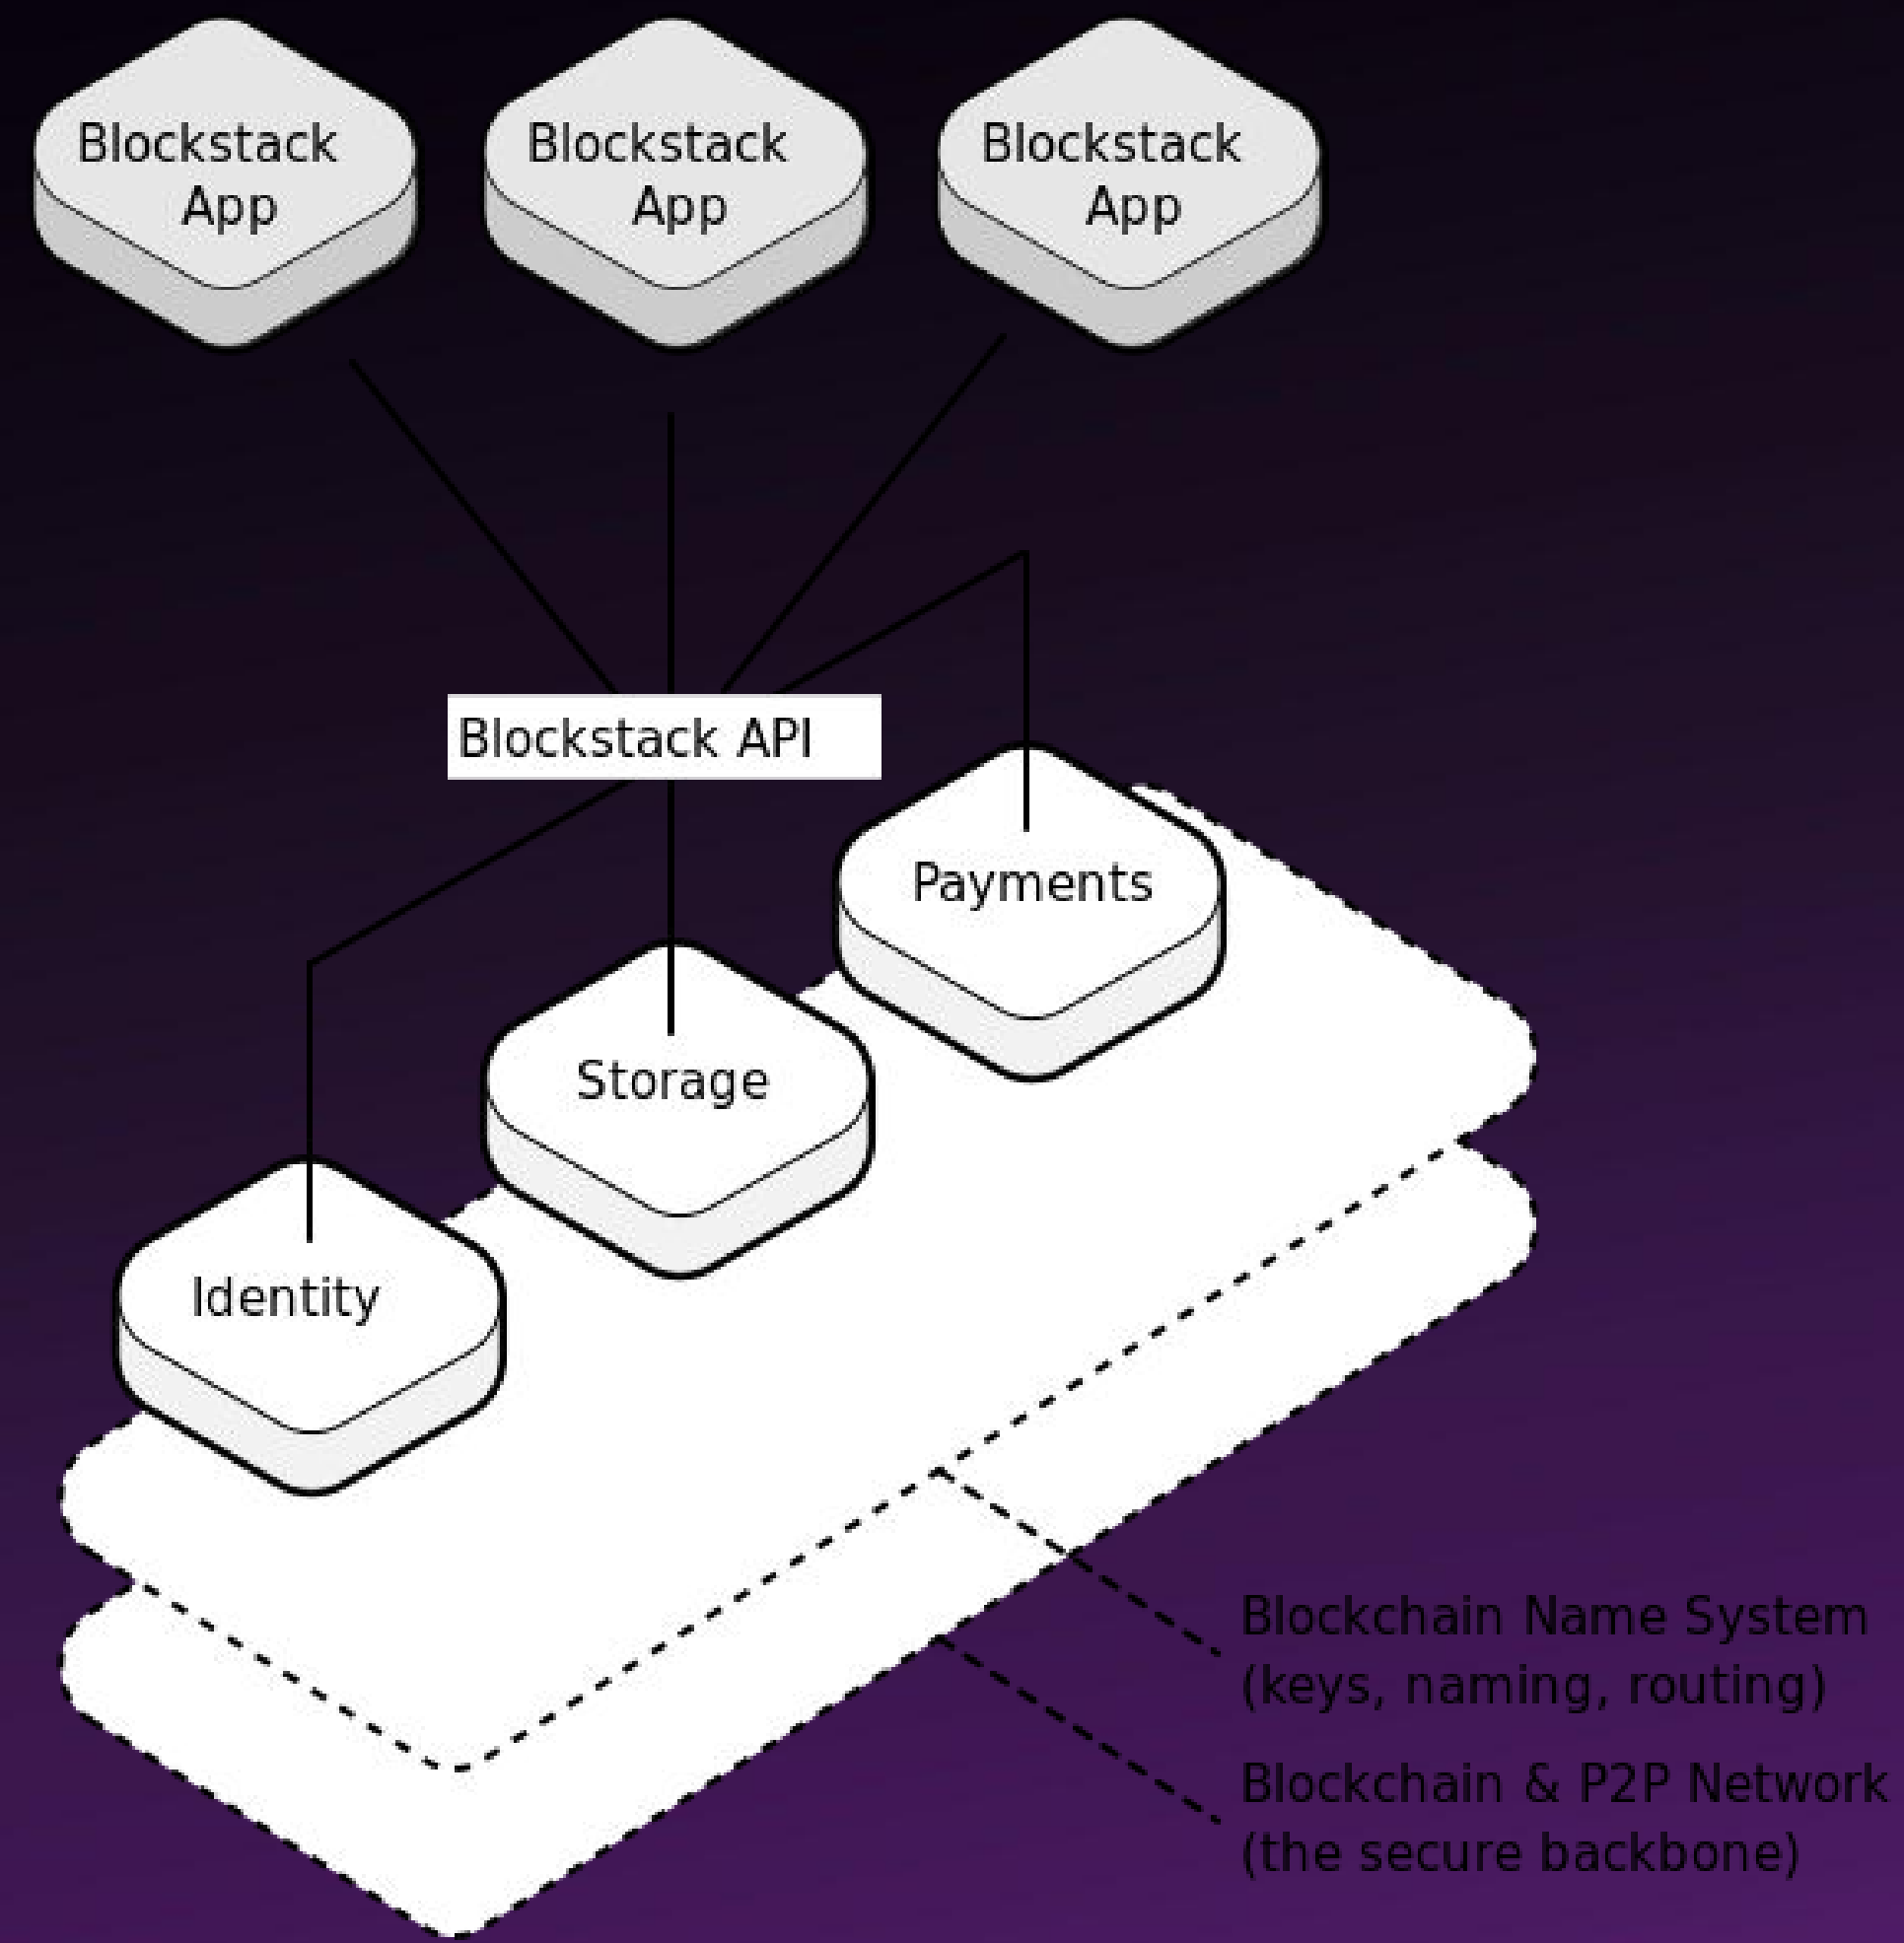

- Complexity
- Security
- Scalability

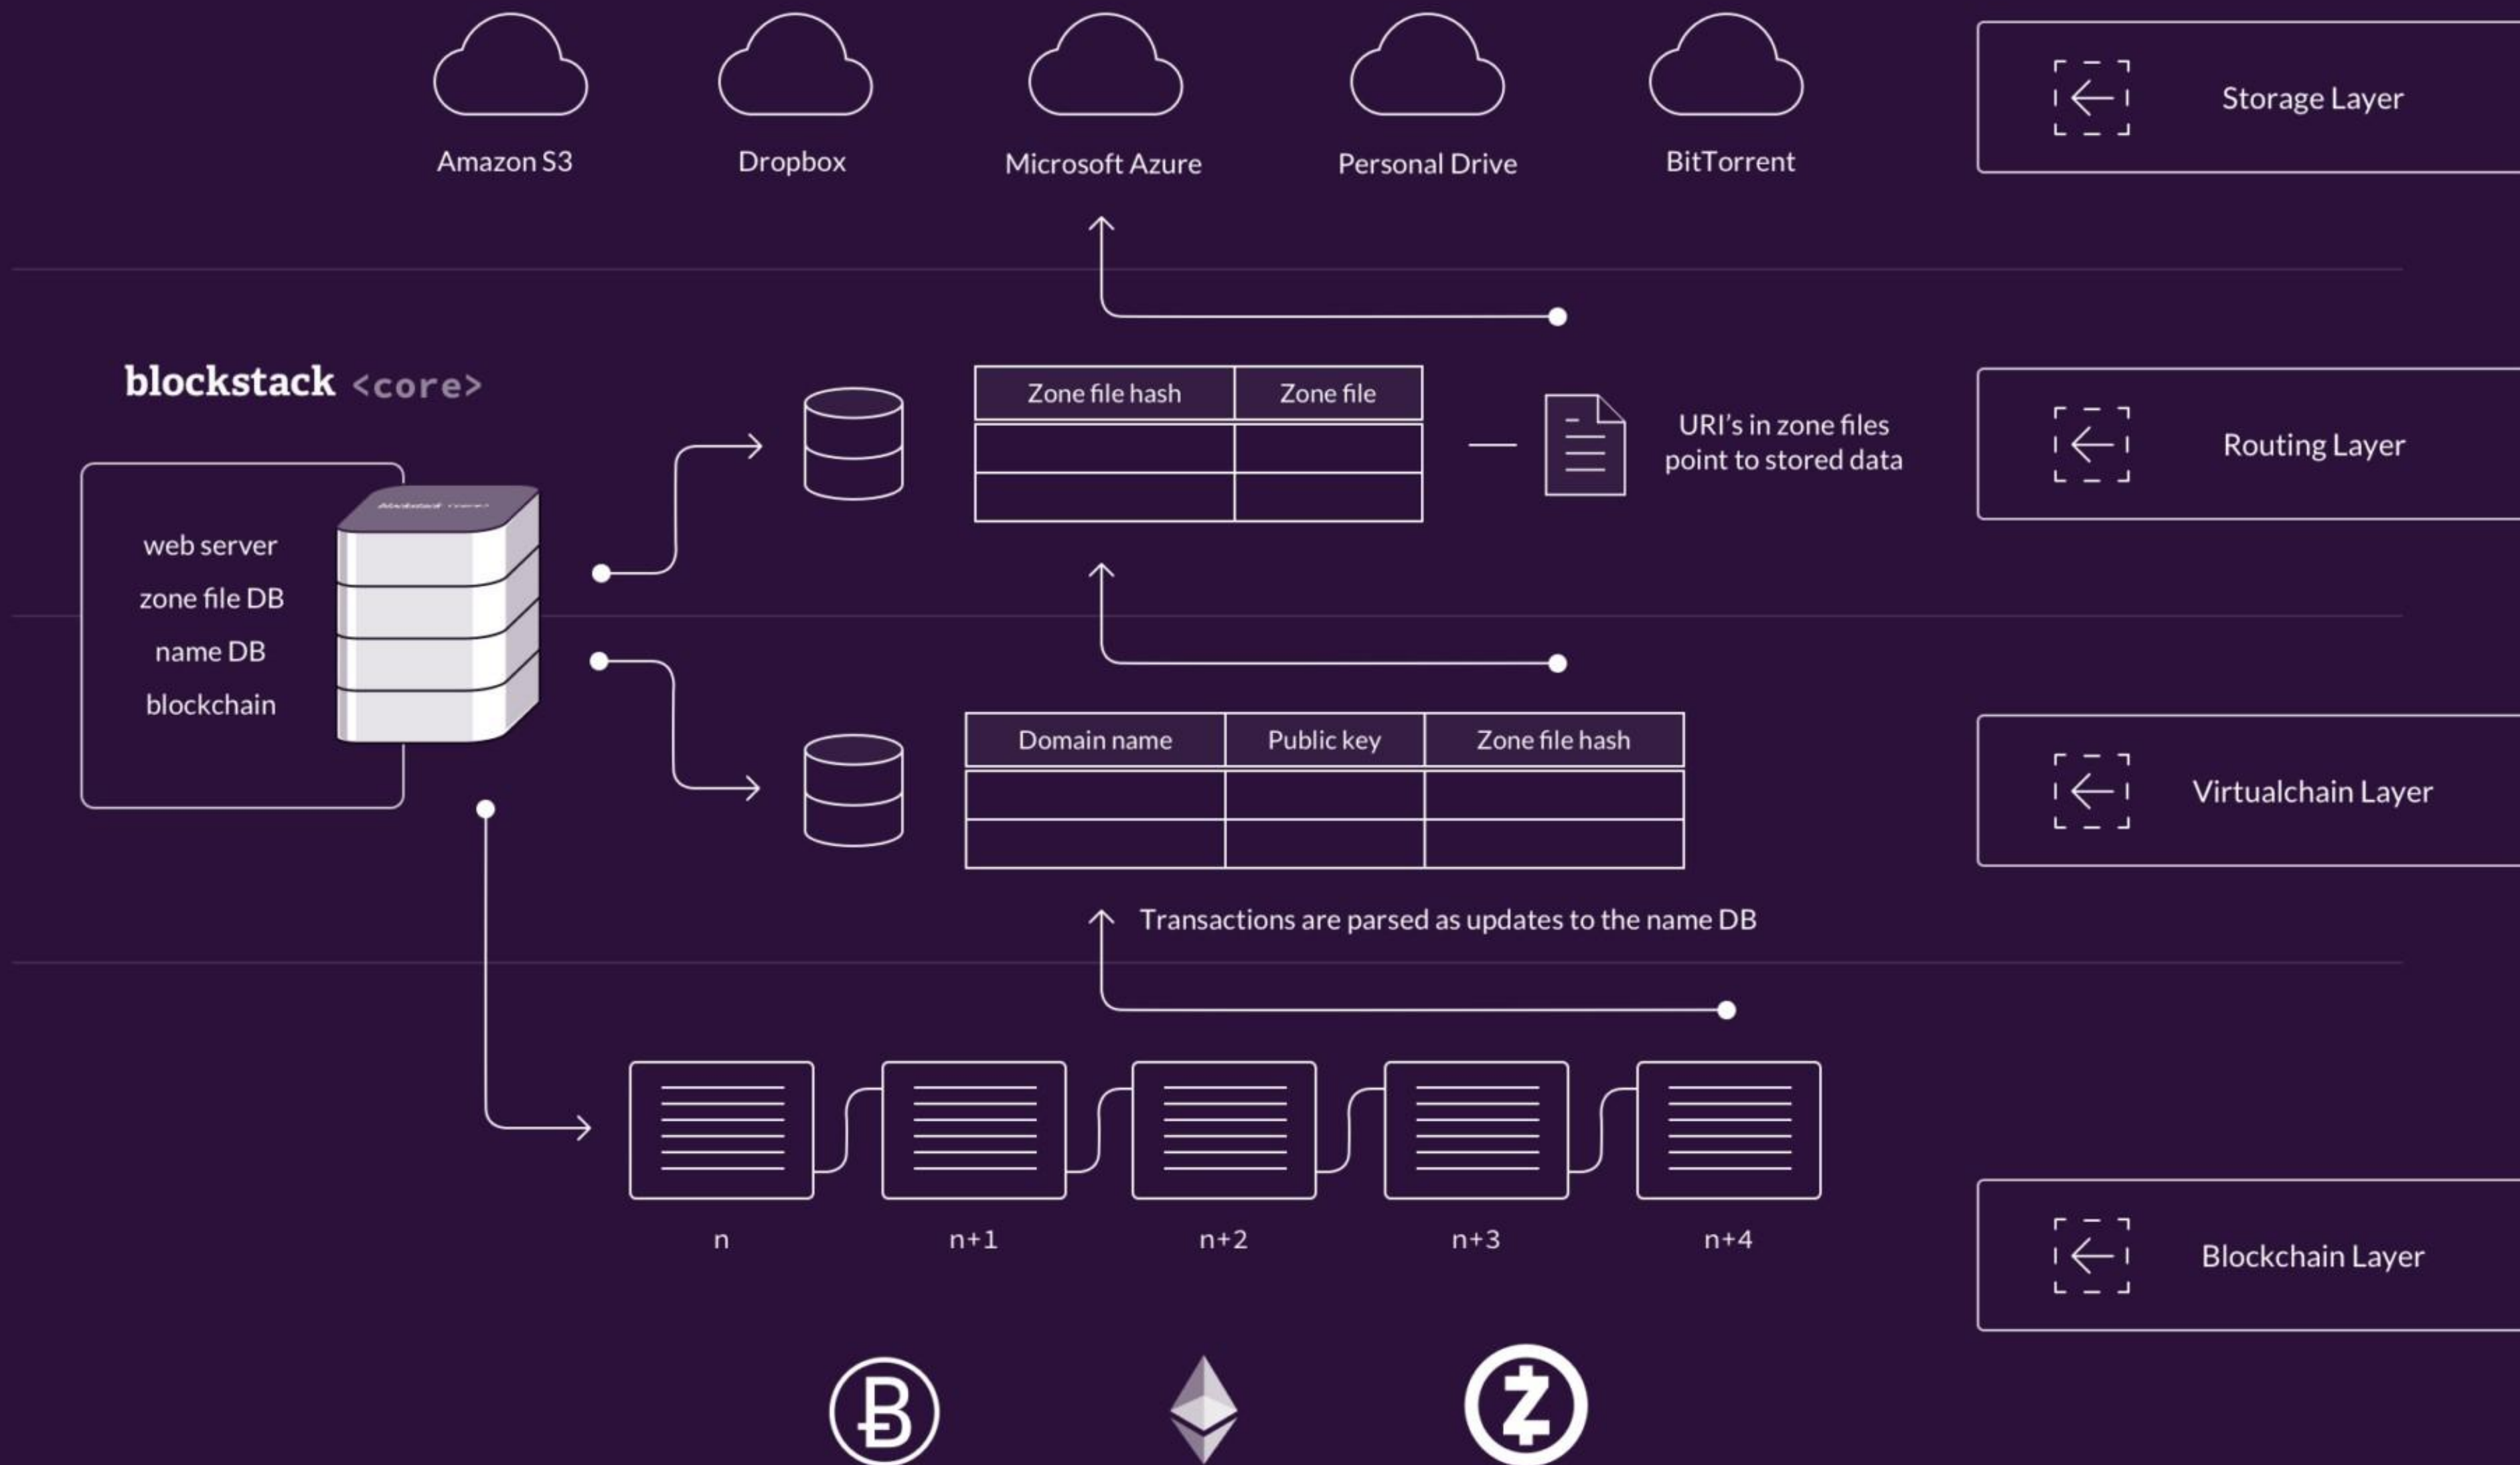

Hello Blockstack!

- Blockstack is a new decentralized internet where users own their data and apps run locally
- A browser portal is all that's needed to get started.

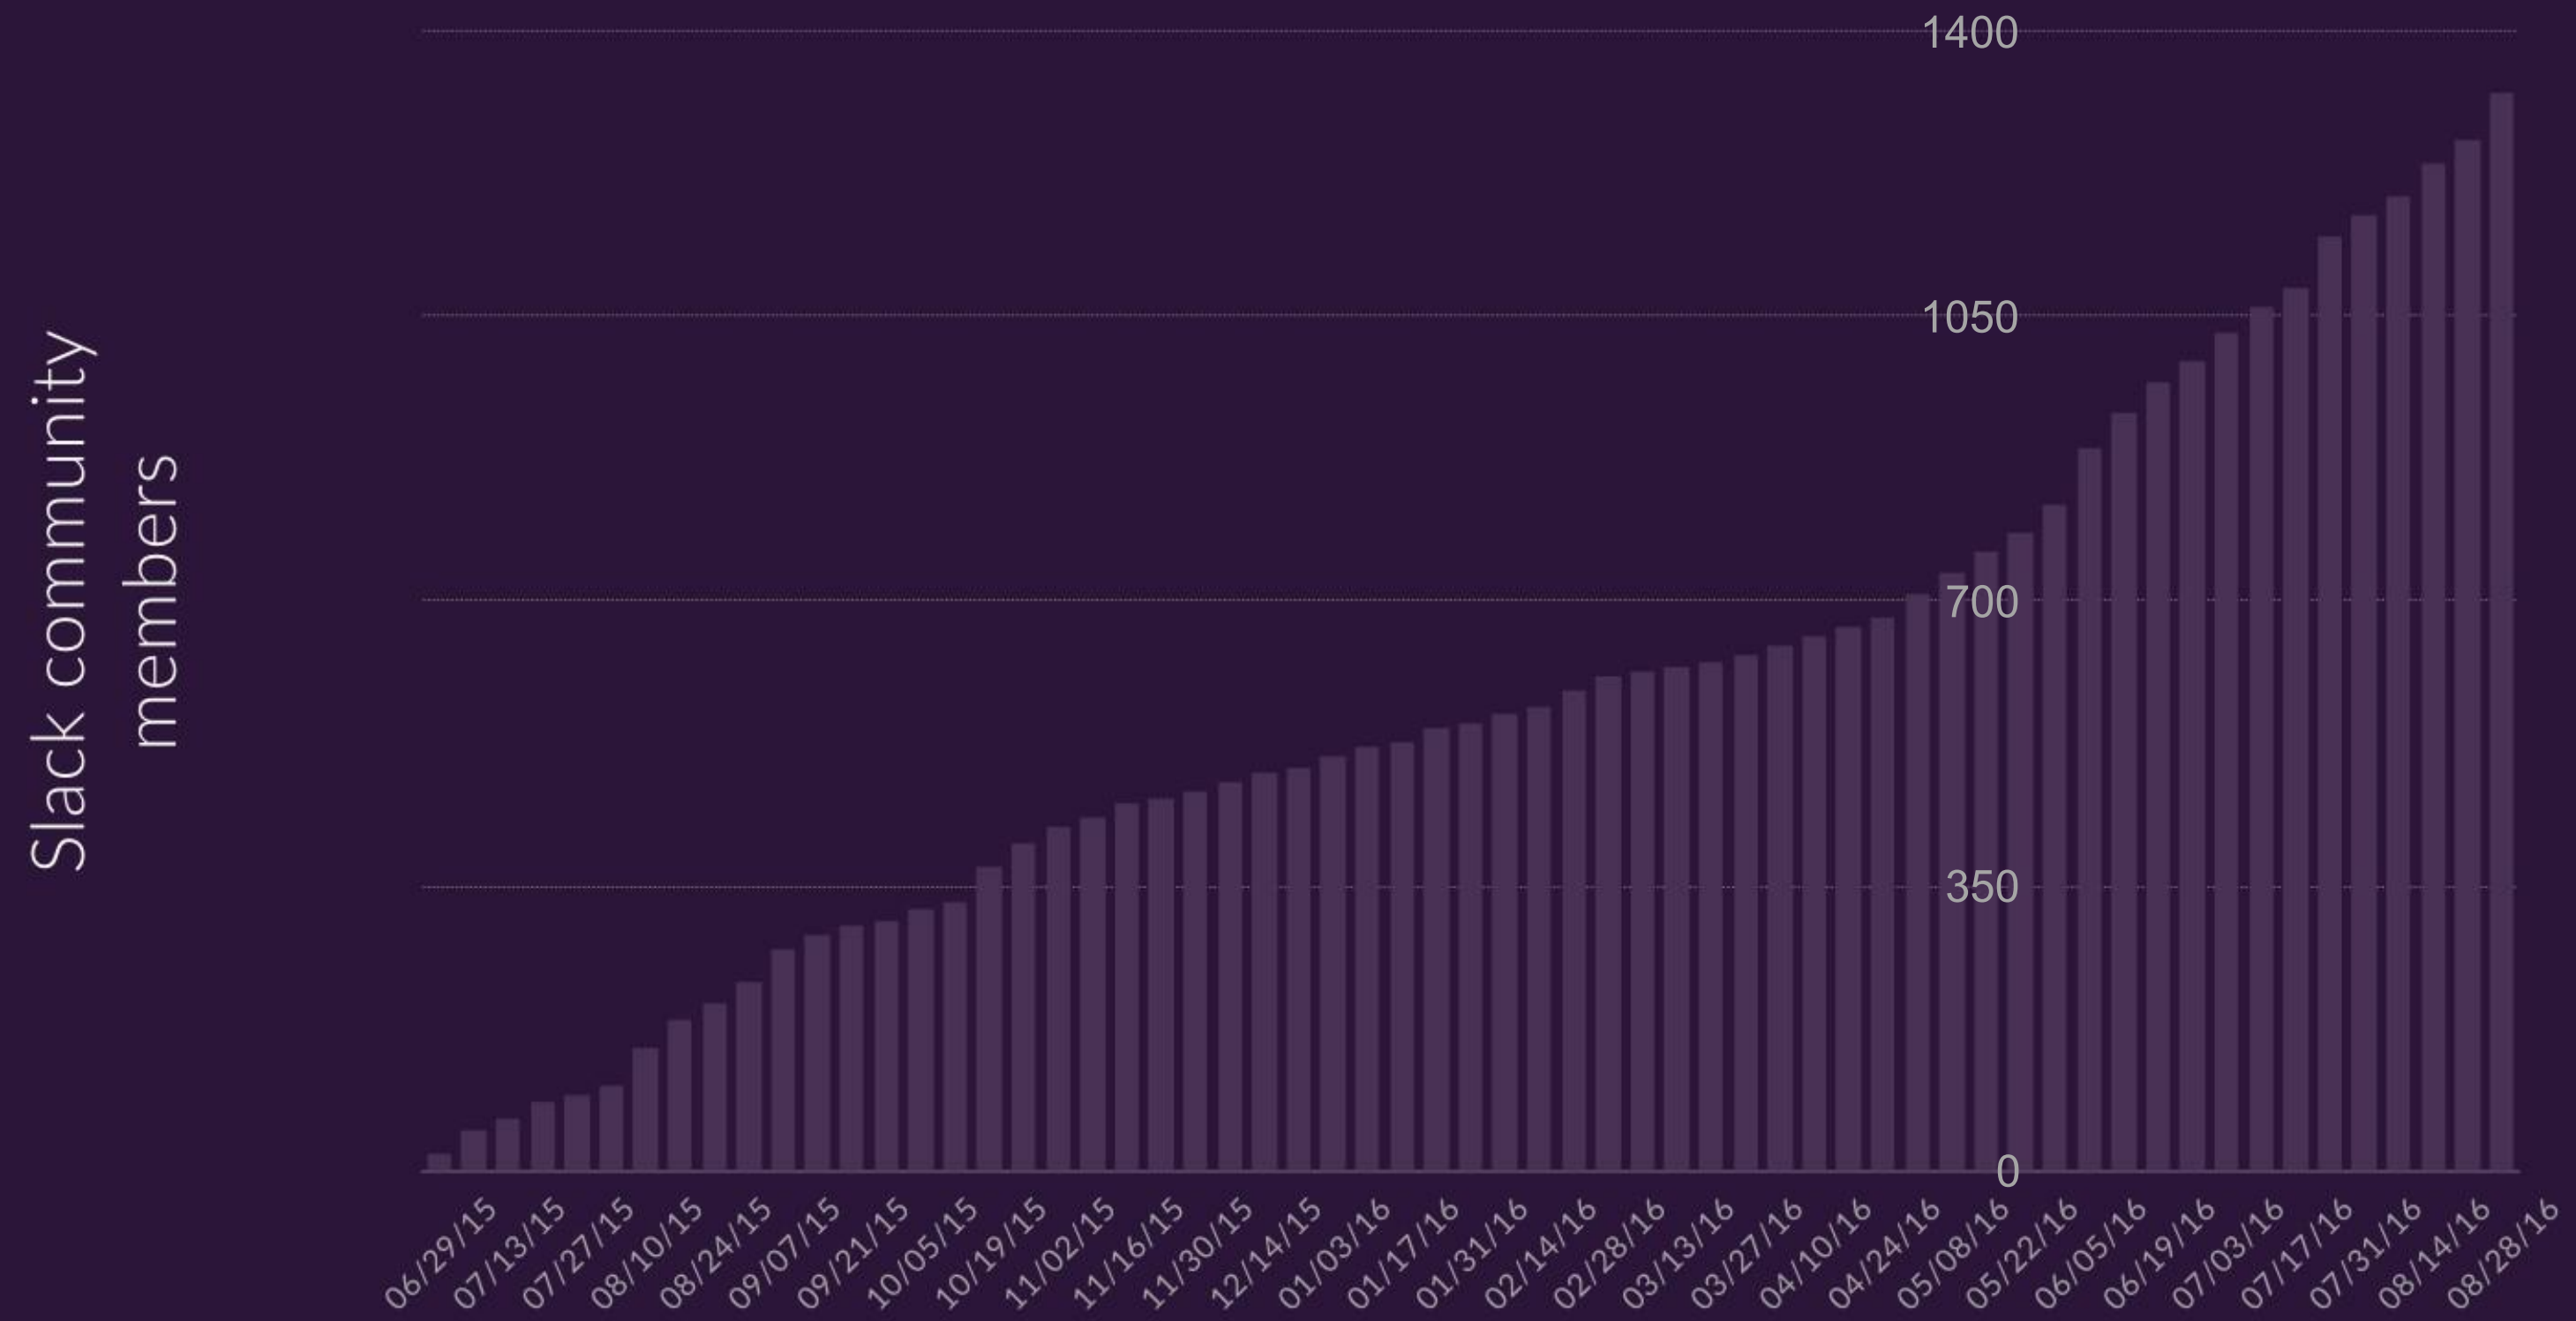

Blockstack - Decentralized Internet

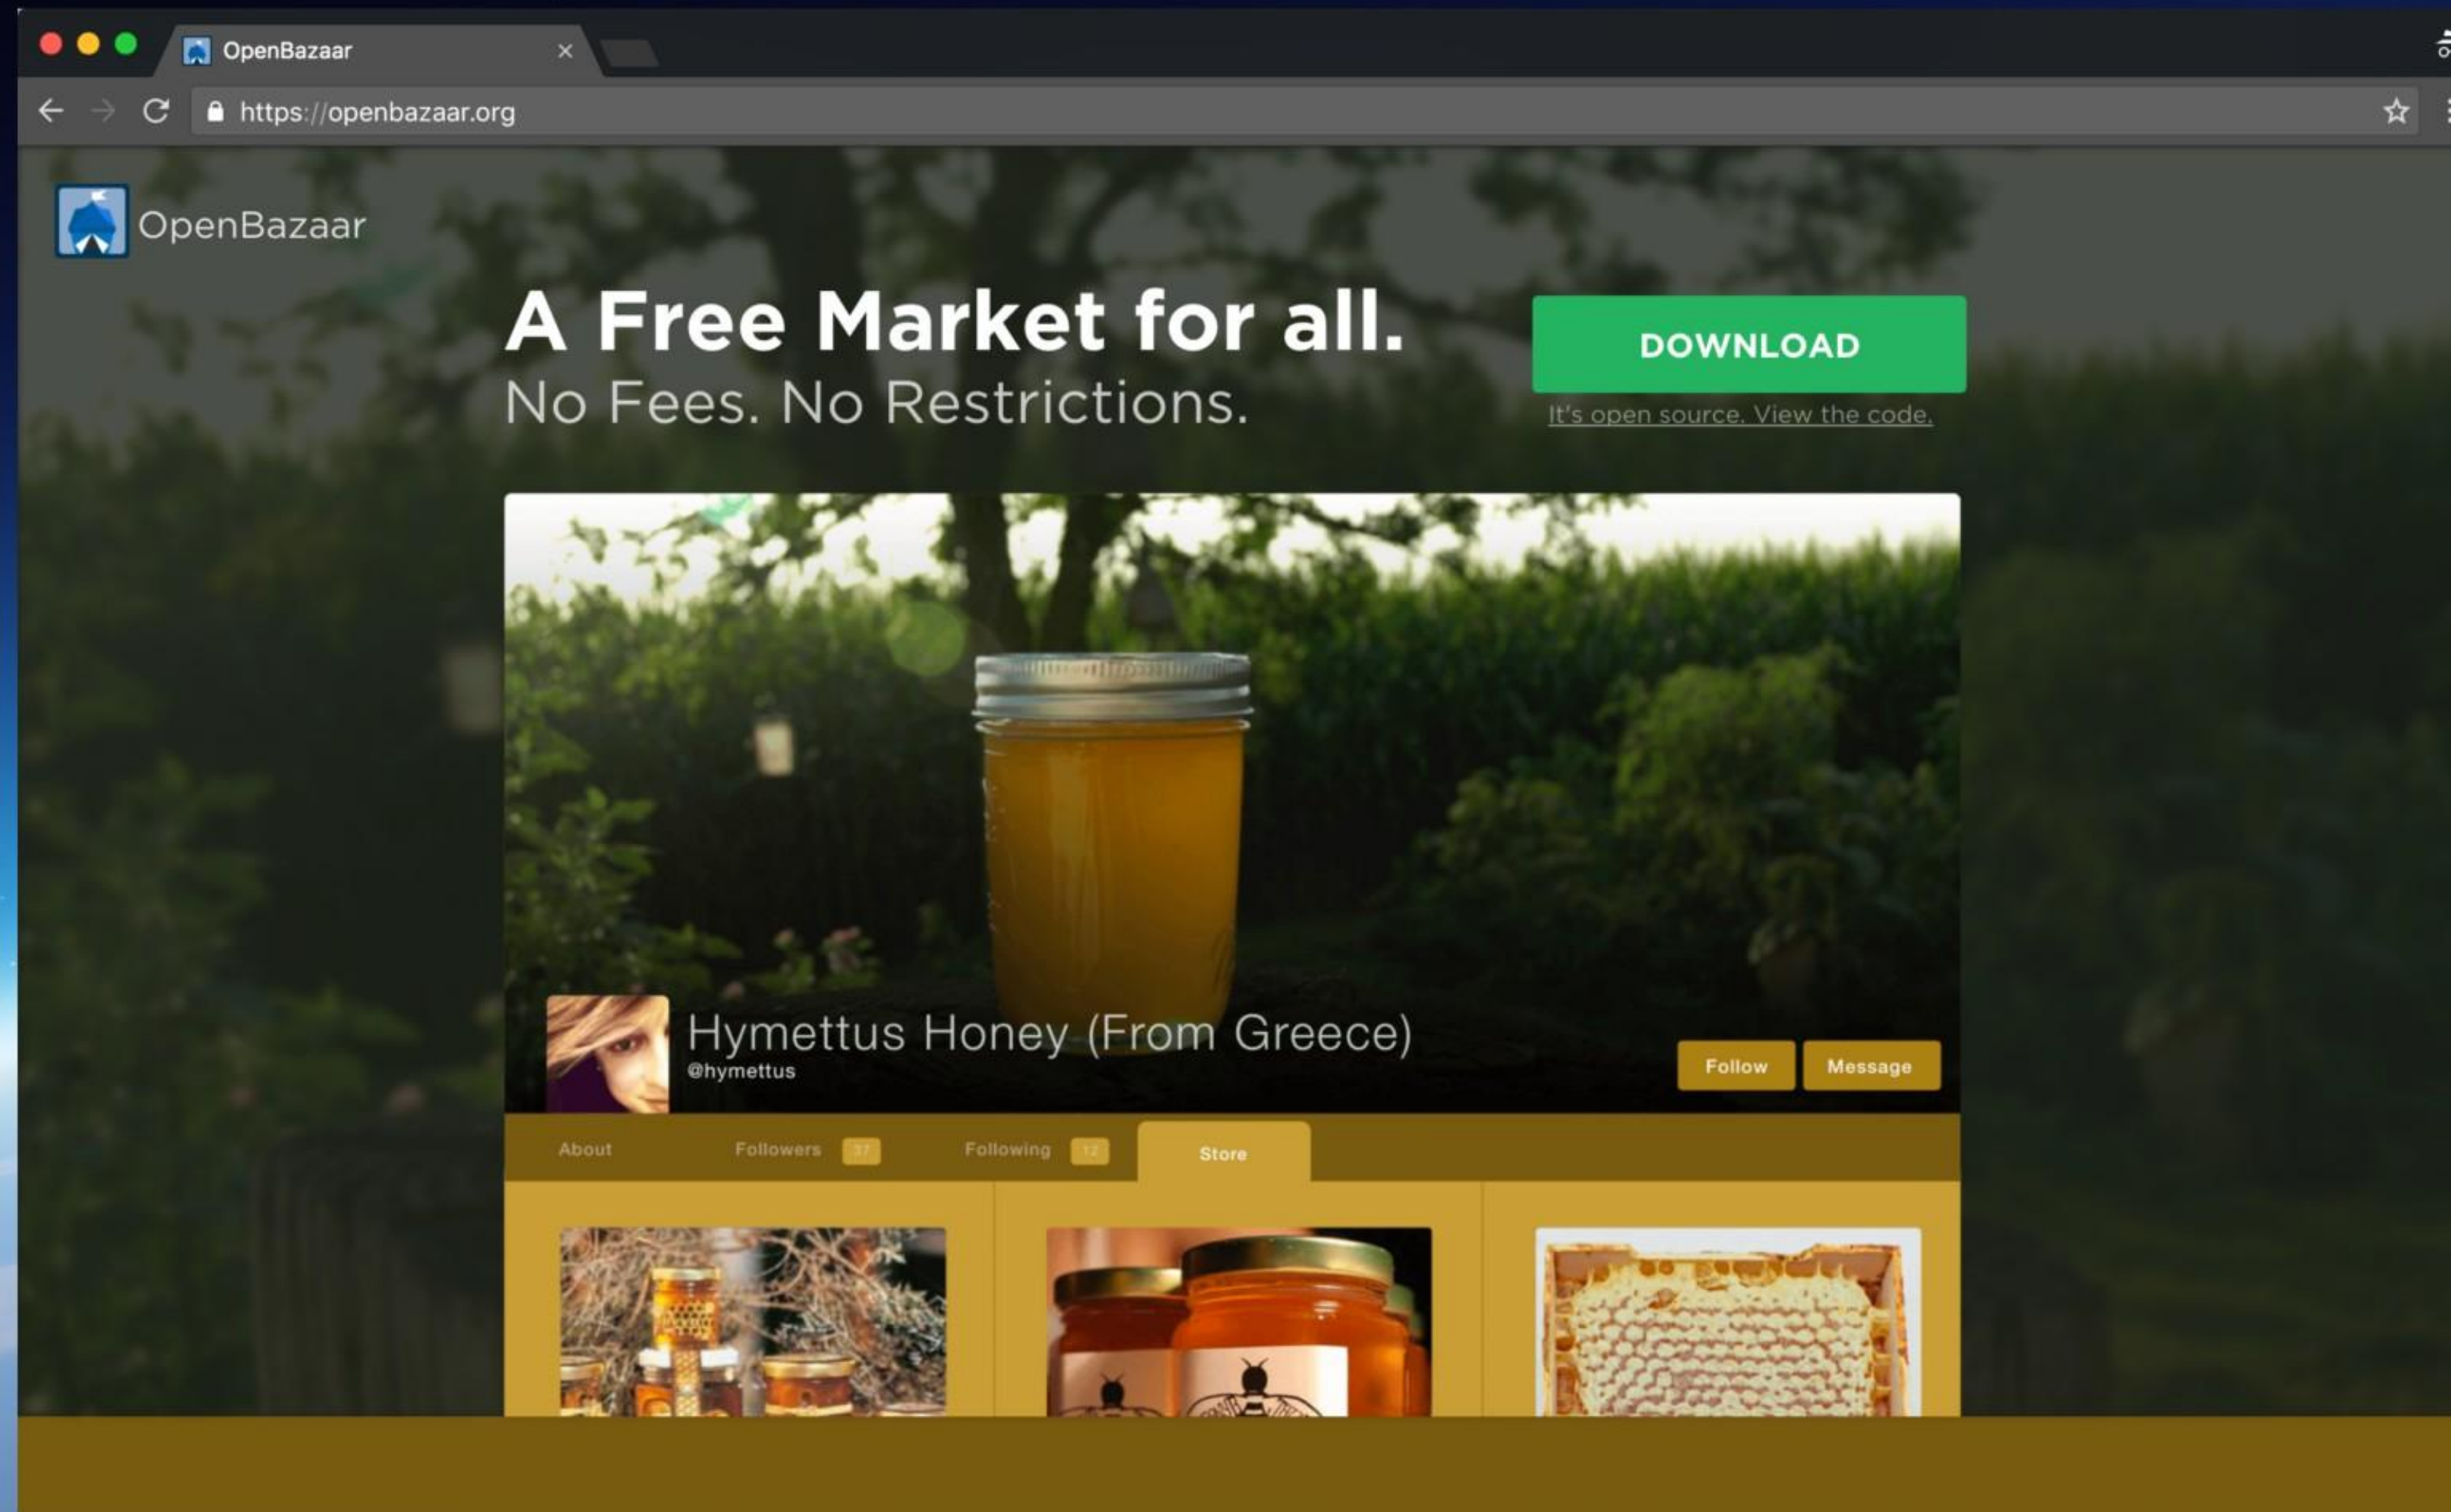

Growth of online developer community

Example of Decentralized Application

OpenBazaar

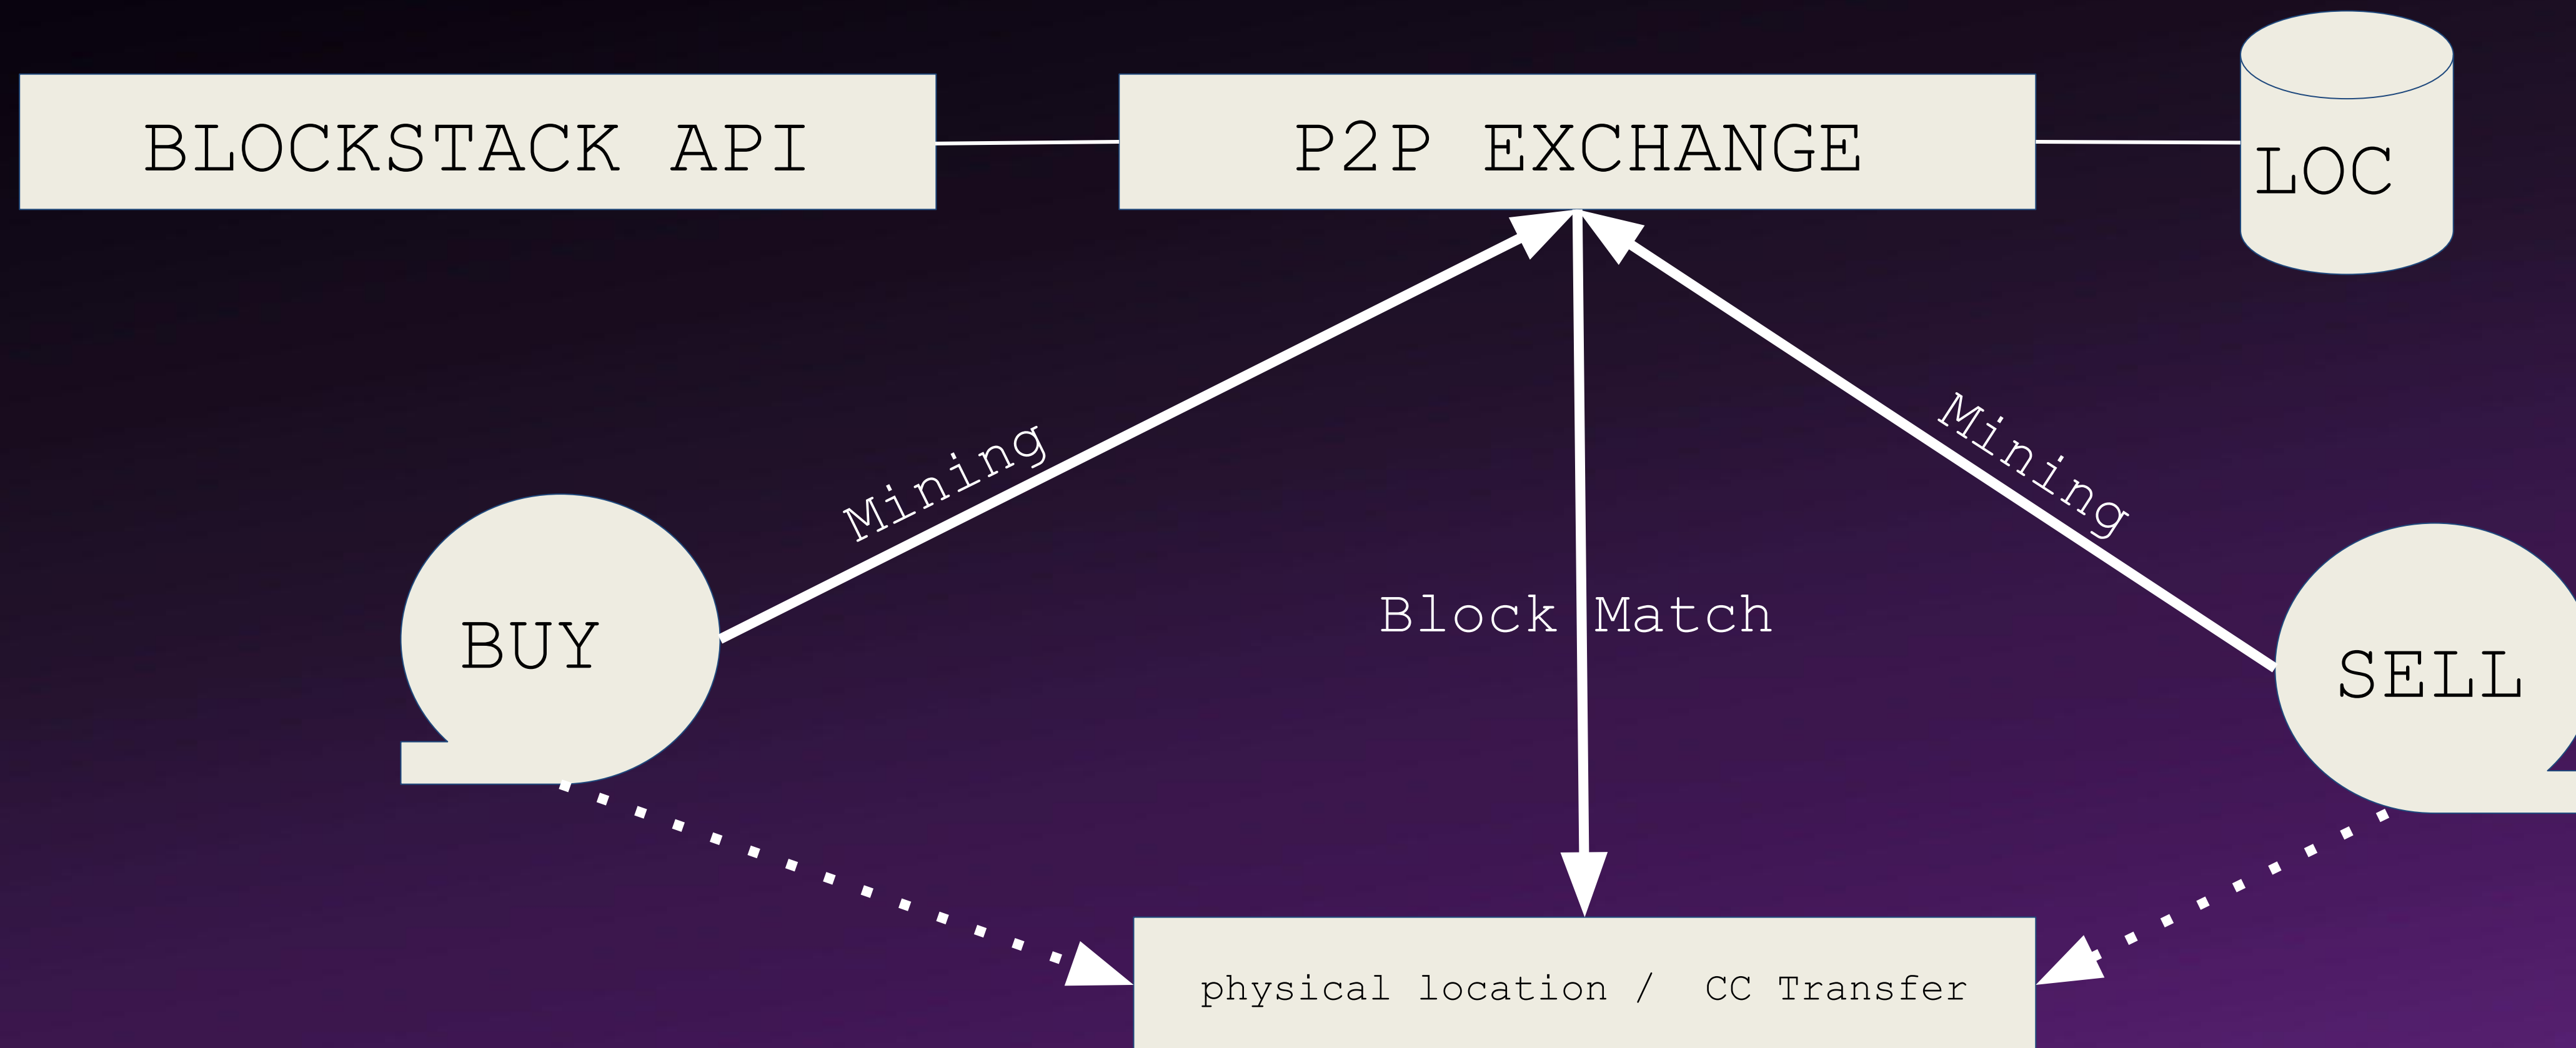

P2P Exchange

Problems ?

- Data Breach (MtGox)
- KYC (every exchange)
- Trust (localbitcoins)

catch me outside how bout dat

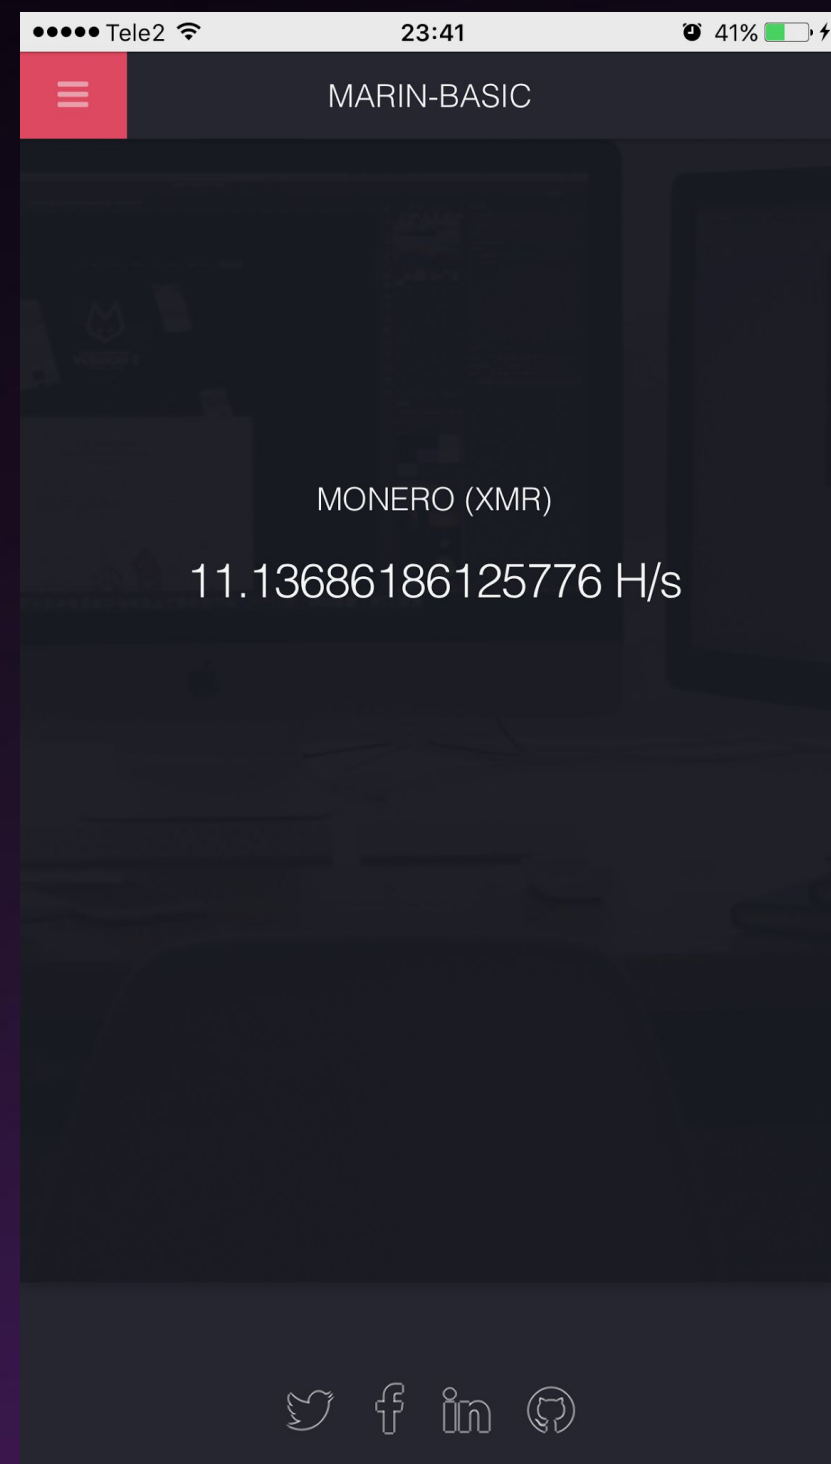

P2P Exchange - Demo

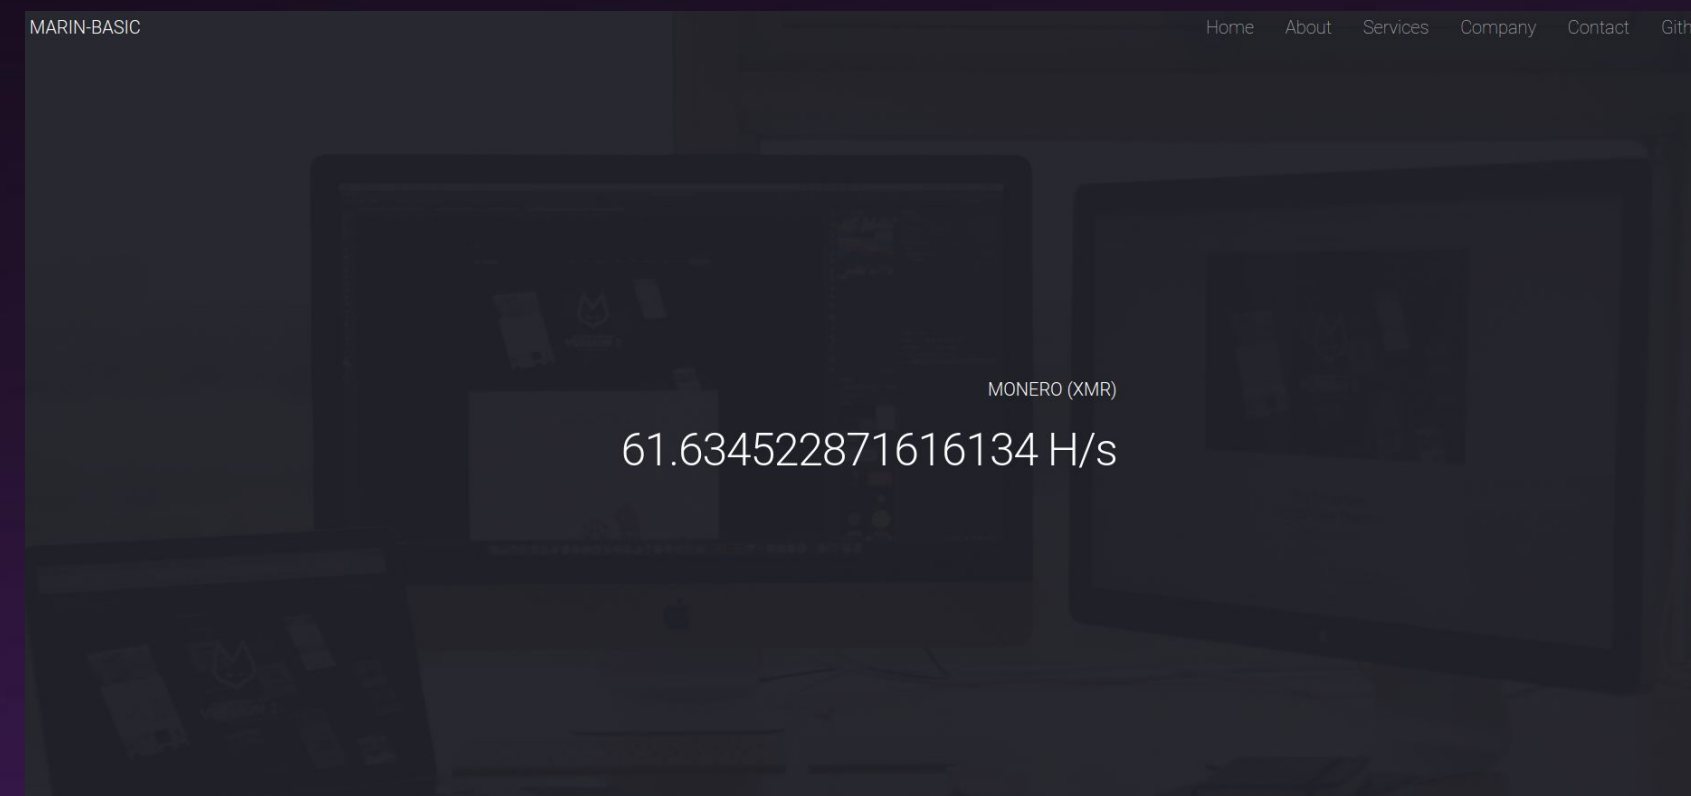

New way of investment / funding ?

PoW ***Proof Of Work***

Phone

PC

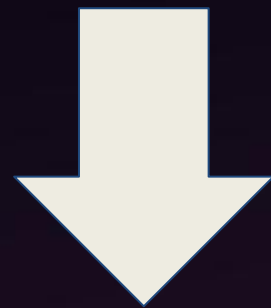

TV

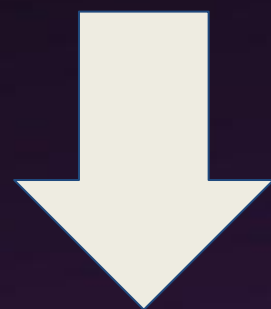

Give me some numbers...

(visits per month * 50 hashes/s * 30 minutes * 60 seconds) / 1000000 * 0.000165

15 000 000 users

~ 21 000 USD = 130 000 HRK / per month

*based on XMR = 90 \$

NO ADS

NO TRANSACTION FEES

Thank You!
